Continuation of 3. NOTE: In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "the cross sectional view of FIG. 5 of the Present Application shows the wide second region 113 holding the loading motor 170 without being stepped upwardly") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Also, the final rejection of claim 1 is maintained (see Office Action, mailed 12/11/2006).
